ISO 9001:2015
Quality Management System

ISO 9001:2015 is a worldwide standard that sets requirements for a strong Quality Management System. It details specific processes, procedures and activities that organizations must create, implement, maintain and improve in order to successfully manage making products or delivering services.

The ISO 9001:2015 certification defines the way an organization operates to meet the requirements of its customers and stakeholders:

- Customer focus
- Leadership
- Engagement of people
- Process approach
- Improvement
- Evidence-based decision-making
- Relationship management

Related training –
- Lead auditor 9001;2015
- Internal audit 9001;2015

BENEFITS

- Improve your products and services
- Increased efficiency and productivity
- Save time and money
- Internationally recognised

- Inspire staff
- Retain customer trust
- Increased profits
- Marketing advantage
- New tender & work opportunities

ISO 14001:2015
Environmental Management System

The International Organization for Standardization (ISO) defines an environmental management system as "part of the management system used to manage environmental aspects, fulfill compliance obligations, and address risks and opportunities."

ISO 14001:2015 should be used by any organization that wishes maintain an environmental management system to conform with its established environmental policy and requirements.

Environment Studies

- Environmental Impact Assessment (EIA)
- Preliminary Environment Report (PER)
- Operational Environment Management Plan (OEMP)
- Construction Environment Management Plan (CEMP)
- Environmental Action Plan (EAP)
- Environment Permit Application (EPA)
- Decommissioning Environment Management Plan (DEMP)
- Environmental compliance Audit

Environment Monitoring

- Indoor Occupational Air Quality
- Gaseous Emission Testing
- Metrological Data Monitoring
- Stack Monitoring Noise Level Monitoring Formaldehyde Monitoring Soil Testing Water Analysis

Related training –

- Waste Management training related to Sustainability.
- Awareness of Waste Management
- Lead auditor 14001 ;2015
- Internal audit 14001 ;2015
- Awareness of 14001;2015

BENEFITS

- Reduce waste
- Drive down costs
- Provide assurance that environmental impact is being measured

- Meet legal obligations
- Improve environmental impact
- Manage environmental obligations

ISO 45001:2018
Occupational Health and Safety Management System

ISO 45001 is the new international standard for occupational health and safety management replacing the OHSAS 18001 standard.

Gaining the ISO 45001 certification allows you to demonstrate that your business operates a best-practice Occupational Health and Safety Management System – reducing the likelihood of accidents and breaches of legislation, as well as improving your organisation's overall performance.

- Health and safety compliance Audit
- AD OHSMS development and implementation
- AD OHSMS Audit
- OSHAD audit and documentation
- HAZID Studies
- HAZOP studies

Related training –

- Site specific safety
- Hazard and Risk assessment
- Emergency response training
- Lead Auditor 45001:2018
- Internal audit 45001:2018
- Awareness 45001:2018
- Firefighting training
- First aid training

BENEFITS

- Reduce Absenteeism
- Reduce Insurance Premiums
- Improve Management of H&S Compliance Issues
- Better Manage Health and Safety Risks
- Establish controls to ensure legal compliance
- Increase Health and Safety Awareness
- Enhance your Reputation

ISO 27001:2022
Information Security Management Systems

ISO 27001:2022 is the international standard that provides a framework for Information Security Management Systems (ISMS) to provide continued confidentiality, integrity and availability of information as well as legal compliance.

ISO 27001 certification is essential for protecting your most vital assets like employee and client information, brand image and other private information.

The ISO standard includes a process-based approach to initiating, implementing, operating and maintaining your ISMS.

ISO 27001 implementation is an ideal response to customer and legal requirements and potential security threats including: cyber crime, personal data breaches, vandalism / terrorism, fire / damage, misuse, theft and viral attacks.

The ISO 27001 standard is also structured to be compatible with other management systems standards, such as ISO 9001 and it is technology and vendor neutral, which means it is completely independent of any IT platform.

Related training –
- Lead auditor 27001:2022
- Internal audit 27001:2022
- Awareness of 27001:2022

BENEFITS

- Quality assurance
- Avoidance and mitigation of damages
- Higher levels of trust

- The easy way to identify data security
- Improves security awareness
- Reduces the risk of cyber attacks

ISO 50001:2018
Energy Management System

An energy management system (EnMS) integrates energy management into existing business systems, enabling organizations to better manage their energy and sustain achieved savings. Companies use an EnMS to establish the policies and procedures to systematically track, analyze, and improve energy efficiency.

ISO 50001, the global standard for energy management systems, provides organizations with an internationally recognized framework for implementing an energy management system (EnMS).

The standard addresses the following:
- Energy use and consumption
- Measurement, documentation, and reporting of energy use and consumption
- Design and procurement practices for energy-using equipment, systems, and processes
- All variables affecting energy performance that can be monitored and influenced by the organization.

Related training –
- Lead auditor 50001:2018
- Internal audit 50001:2018
- Awareness of 50001:2018

50001:2018 Services:
- Energy Survey report

BENEFITS

- Increasing energy efficiency and optimizing resources
- Limit harmful environmental impact
- Achieve ecological goals
- Reducing costs
- Secure more business

ISO 22000:2018/HACCP
Food Safety Management System

ISO 22000 is a set of guidelines that help businesses to set out and manage a Food Safety Management System (FSMS).

The processes and procedures that a business implements through ISO 22000 will help them to identify, monitor, reduce and prevent food safety hazards at any stage of the food chain.

This globally recognised standard complies with the Codex HACCP Principles and has regulatory approval.

Related training -
- Basic food hygiene
- Person in charge (PIC)
- HACCP awareness
- Food Safety Lead auditor

BENEFITS

- Improved management and communication.
- Assurances on quality, reliability and safety.
- Decrease costs from withdrawals or recalls.

- Less food borne diseases.
- Better quality and safer jobs in the food industry.
- Better utilisation of resources.
- More efficient food safety hazard control.

ISO 41000:2018
Facility Management System

Facility Management is an essential component of any organization and is one of the fastest growing professional and operational disciplines worldwide.

ISO 41001 Standard is aimed at the Facility Management (FM) sector. The ISO 41000 Standard will provide practical guidance on the Facility Management best practices to the employees of the FM companies and other organizations.

The ISO 41000 Standard is for organizations that focus on building management or facility management. It helps FM Companies to:
- Demonstrate the efficiency and effectiveness of their FM practices
- Consistently define the requirement of all parties involved in the facility management process.
- Become sustainable in the competitive environment

Related training -
- Lead auditor 41000:2018
- Internal audit 41000:2018
- Awareness of 41000:2018

BENEFITS

- Stay ahead in the competition
- Measure performance and evaluate business goals
- Enhance transparency and clarity of work
- Enhance productivity
- Save time
- Reduce cost
